

## UiPath Studio Community Edition \*\*\*\*\*u

Gereksinim: UiPath Cloud Hesabı

1. <https://download.uipath.com/UiPathStudioSetup.exe> linkinden \*\*\*\*\* dosyası indirilir ve çalıştırılır. \*\*\*\*\* otomatik olarak oturum açılan kullanıcı için bulunduğunuz makinede gerçekleşecektir. Normalde \*\*\*\*\* 5-10 dakikadan uzun sürmez. Eğer uzun sürüyorsa bilgisayarı tekrardan başlatıp \*\*\*\*\*u deneyebilirsiniz.
2. \*\*\*\*\* bittikten sonra giriş ekranı karşımıza gelir.

3. UiPath Cloud Hesabımız ile devam edeceğimiz için Service URL kısmına <https://cloud.uipath.com> yazarak Sign in devam edilir. Sign in dedikten sonra otomatik olarak UiPath Cloud Hesabı giriş sayfasına yönlendirir. UiPath Cloud Hesabı ile giriş yaptıktan sonra profil seçme ekranı açılır. Buradan **UiPath Studio** seçmemiz gerekir.

4. \*\*\*\*\* tamamlanmıştır.

## New Project

**Process**

Start with a blank project to design a new automation process.

**Library**

Create reusable components and publish them together as a library. Libraries can be added as dependencies to automation processes.

**Template**

Create a template that you can use in other automation projects.

## New from Template

**Robotic Enterprise Framework**

Create a transactional business process that follows best practices for large scale deployments.

**Background Process**

Create a process that starts in the Background and can run concurrently with other processes for as long as it doesn't use UI interaction.

**Orchestration Process**

Implement a process through service orchestration and human intervention as well as through long-running transactions.

**Transactional Process**

Model a process as a flowchart diagram.
